

How to edit map settings in Local Theme Jack – Standard

The screenshot shows the WordPress dashboard with the 'Maps Jack' menu item highlighted in the left sidebar. The main content area displays the 'Maps Jack' settings page, which includes a table of maps and an 'Add New Map' button. The table has the following data:

S.No	Title	Shortcode	Clone	Edit	Remove
1	Location	[WPMAPSJACK id='1']			
2	Footer Map	[WPMAPSJACK id='2']			

Red arrows indicate the steps: 1. First click on menu "Maps Jack" (pointing to the sidebar menu item) and 2. Then click to edit this Map (pointing to the 'Edit' button for the 'Location' map).
